

Model: IASW

READ AND UNDERSTAND

CLEANING

Proper cleaning of your integral silencer is imperative for a long lifespan and to maintain the ability to disassemble. Cleaning must be performed after every shooting session, not to exceed five hundred rounds per shooting session before cleaning. Clean the firearm as recommended by the manufacturer, however, use a bore snake, not a cleaning patch when cleaning the barrel and chamber of the firearm. Specialty bore snakes for integrals, and permanently pinned suppressors are available in our webstore.

***Before cleaning be certain the firearm is unloaded, the magazine is removed and the bolt is open and locked back. Keep the firearm pointed in a safe direction at all times.**

#1. Remove the core from the tube body.

Grasp the tube body firmly and insert the provided takedown tool in the front of the suppressor core (muzzle end). Unscrew the core from the tube by turning the tool counter clockwise until the core is free of the tube body.

#2. Clean the inside of tube body.

Hold the firearm vertically to the ground or floor over a disposable cloth. Slide the core in and out of the tube body while using a twisting motion. This will loosen lead and powder build up and allow the debris to fall onto the ground or disposable cloth. Wipe clean the internal threads of the tube body with a clean cloth and gun solvent (such as hoppes #9). After assuring the threads are clean, place a small amount of synthetic grease on the threads.

#3. Cleaning the silencer core.

With a clean cloth and gun solvent wipe clean the outside and inside of the core and the external threads of the core. After assuring the threads are clean, place a small amount of synthetic grease on the threads. To deep clean the core chambers, you may submerge the core in gun solvent over night or over several days to break down the buildup and use a bore brush and gun solvent to scrub the chambers clean.

#4. Reassemble the core to the tube body.

Once cleaning is completed, screw the core in the tube body firmly together.
